

Table 1. Fish and freshwater crustaceans (crayfish and shrimp) observed at the Riverbend Lane site (site code: HD14DENM1, site reference: 6031576) on the Denmark River

	Scientific name	Common name	Previously reported <sup>1</sup> in the subcatchment	Observed at site
				March 2020 Bunuru <sup>2</sup> (hottest part of the year)
FISH	<i>Bostockia porosa</i>	nightfish	-	Y (first record)
	<i>Galaxias occidentalis</i>	western minnow	-	Y (first record)
	<i>Nannoperca vittata</i>	western pygmy perch	-	Y (first record)
	<i>Pseudogobius olorum</i>	blue-spot goby (or swan river goby)	^	Y (first record)
	<i>Galaxias maculatus</i>	common jollytail	-	Y (first record)
	<i>Geotria australis</i>	pouched lamprey <sup>3</sup>	*	-
CRUSTACEANS	<i>Cherax quinquecarinatus</i>	gilgie	-	Y (first record)
	<i>Palaemon australis</i>	south-west glass shrimp	-	Y (first record)

Colour key for species:

Native: Freshwater	Native: Estuarine-Freshwater	Native: Anadromous (Marine-Fresh)
-----------------------	---------------------------------	--------------------------------------

For images and more information, see <https://rivers.dwer.wa.gov.au/southwest/fauna/>

<sup>1</sup> Based on all available data reported to Department of Primary Industries and Regional Development as a requirement of species collection exemptions (see <http://freshwater.fish.wa.gov.au/>), prior to most recent assessment. Y = yes (recorded).

<sup>2</sup> One of the six seasons of the Aboriginal (Noongar) Calendar for south-west Australia (for more information see <http://www.bom.gov.au/iwk/calendars/nyoongar.shtml>).

<sup>3</sup> Pouched lamprey (*Geotria australis*) is listed by the Department of Biodiversity Conservation and Attractions as Priority 3, poorly known species.

^ This species is known to move between estuarine and river environments and has been reported in upstream subcatchment(s) in this system. Note: this species is known to reside wholly in some rivers so may no longer move through this site or this may only occur intermittently (e.g., during flooding).

\* Pouched lamprey has been reported elsewhere in the river system. This species migrates from the ocean to nursery habitats in some headwater streams.
