¹ Based on all available data reported to Department of Primary Industries and Regional Development as a requirement of species collection exemptions (see <http://freshwater.fish.wa.gov.au/>), prior to most recent assessment. Y = yes (recorded), Y (F) = first time reported in the subcatchment, and a dash (-) indicates species was not recorded.

² Balston's pygmy perch (*Nannatherina balstoni*) is listed as vulnerable under the [Biodiversity Conservation Act 2016](#) (state, Western Australia) and the [Environment Protection and Biodiversity Conservation Act 1999](#) (Commonwealth). It is listed as endangered under the [ICUN Redlist](#) of Threatened Species 2019 (International).

³ Western mud minnow (*Galaxiella munda*) is listed as vulnerable under the [Biodiversity Conservation Act 2016](#) (state, Western Australia) and endangered on the [ICUN Redlist](#) of threatened species 2019 (international).

⁴ Pouched lamprey (*Geotria australis*) is listed by the [Department of Biodiversity Conservation and Attractions](#) as priority 3, poorly known species.

This species may occur in the subcatchment as has been recorded in both upstream and downstream subcatchments and is known to undertake localised migrations between subcatchments.
