

Table 1. Fish and freshwater crustaceans (crayfish and shrimp) observed at the Quindanning site (site code: MR665WILL1, site reference: 6144447) on the Williams River.

	Scientific name	Common name	Previously reported <sup>1</sup> in the subcatchment	Observed at site	
				Spring or <a href="#">Kambarang</a> Oct 2019	Autumn or <a href="#">Bunuru</a> March 2020
FISH	<i>Galaxias occidentalis</i>	western minnow	Y	Y	Y
	<i>Bostockia porosa</i>	nightfish	Y	Y	-
	<i>Nannoperca vittata</i>	western pygmy perch	Y	-	-
	<i>Pseudogobius olorum</i>	blue-spot goby	^	Y (F)	Y
	<i>Gambusia holbrooki</i>	eastern gambusia	Y	Y	Y
CRUSTACEANS	<i>Cherax quinquecarinatus</i>	gilgie	-	Y (F)	Y

Colour key for species:

Native: Freshwater	Native: Estuarine-Freshwater	Non-Native (Exotic, Invasive, or Introduced)
-----------------------	---------------------------------	---

For images and more information, see <https://rivers.dwer.wa.gov.au/southwest/fauna/>

<sup>1</sup> Based on all available data reported to Department of Primary Industries and Regional Development as a requirement of species collection exemptions (see <http://freshwater.fish.wa.gov.au/>), prior to most recent assessment Y = yes (recorded), and a dash (-) indicates species was not recorded. (F) = first record of a species at a site.

^ This species is known to move between estuarine and river environments and has been reported in upstream subcatchment(s) in this system. Note: this species is known to reside wholly in some rivers so may no longer move through this site or this may only occur intermittently (e.g. during flooding).

Table created December 2021. Please check <https://rivers.dwer.wa.gov.au/catchment/murray-serpentine-rivers/> for more information.
