¹ Based on all available data reported to Department of Primary Industries and Regional Development as a requirement of species collection exemptions (see <http://freshwater.fish.wa.gov.au/>), prior to most recent assessment. Y = yes (recorded), Y (F) = first time reported in the subcatchment, and a dash (-) indicates species was not recorded.

This species may occur in the subcatchment as it has been recorded in both upstream and downstream subcatchments and is known to undertake localised migrations between subcatchments

² Pouched lamprey (*Geotria australis*) is listed by the [Department of Biodiversity Conservation and Attractions](#) as priority 3, poorly known species.

* Pouched lamprey (*Geotria australis*) have been reported elsewhere in the river system. This species migrates from the ocean to nursery habitats in some headwater streams.

³ Species observed but not caught in nets or traps.
