

Table 1. Fish and freshwater crustaceans (crayfish and shrimp) observed at the Susannah Brook Reserve Number 50069 site (site code: SR241SUSA1, site ref 6167212) on the Susannah Brook.

|          | Scientific name                | Common name         | Previously reported <sup>1</sup> in the subcatchment | Observed at site                             |  |
|----------|--------------------------------|---------------------|--|--|--|
|          |                                |                     |  | Spring or <a href="#">Kambarang</a> Nov 2018 | Spring or <a href="#">Kambarang</a> Nov 2022 |
| FISH     | <i>Nannoperca vittata</i>      | western pygmy perch | Y  | Y (F)  | -  |
|          | <i>Galaxias occidentalis</i>   | western minnow      | Y  | Y (F)  | Y  |
|          | <i>Gambusia holbrooki</i>      | eastern gambusia    | #  | -  | -  |
| CRAYFISH | <i>Cherax quinquecarinatus</i> | gilgie              | -  | -  | Y (F)  |
|          | <i>Cherax destructor</i>       | yabby               | Y  | Y (F)  | Y  |

Colour key for species:

|                       |   |
|-----------------------|---|
| Native:<br>Freshwater | Non-Native<br>(Exotic, Invasive, or Introduced) |
|-----------------------|---|

For images and more information, see <https://rivers.dwer.wa.gov.au/southwest/fauna/>

<sup>1</sup> Based on all available data reported to Department of Primary Industries and Regional Development as a requirement of species collection exemptions (see <http://freshwater.fish.wa.gov.au/>), prior to most recent assessment Y = yes (recorded), and a dash (-) indicates species was not recorded.

# This species **may** occur in the subcatchment as it has been recorded in both upstream and downstream subcatchments and is known to undertake localised migrations between subcatchments.

Table created December 2022. Please check <https://rivers.dwer.wa.gov.au/catchment/swan-avon-river-lower-swan-river/> for more information.
